

## INVERESK REPORT June 2010

### Works programme

#### AAL+1

Wood panelling has been placed on the outer walls of this vehicle

Window glass has been delivered as has the glass for the doors. Damian Camplin has the file containing the stencil for the etching to be placed in the door glass. We are going to see if one of the signwriters in Launceston is able to cut the stencil for us

#### AB2

All first class seat backs and two seat cushions have been completed and are in place

Varnishing of the woodwork with a high gloss varnish is being carried out by our craftsman painter

The planned completion date for this vehicle is 30<sup>th</sup> July

### CC Wagon

The bogies have been undercoated with metal primer.

- All the workings that are under the vehicle is being placed on the body.
- More metal primer is need for this vehicle and a request is being submitted for this

## Other News

### Bogeys

Two bogeys have been retrieved from the Kings Wharf area. They are of the type used under carriage AB+5. Two wheel sets are in good condition but as you can see there are parts missing and there is also large use of timber in the construction of the bogey. Two of the wheel sets are made by Vickers.

AD1

This  
s  
vehicle  
was  
entered

in the Launceston City Council Heritage Awards and we gained a special award. A cheque for \$2000.00 has been received from the Launceston City Council as part of the award. Our thanks to Bill McGowan for the work done in entering the vehicle in the awards.

### Stands

Two heavy duty stands that stand on concrete suitable to be placed under vehicles have been sent to Don.
